yourSRI – the Next Generation
of ESG Data Services

yourSRI's Products and Services

yourSRI is a “one stop-solution” for responsible investment. The leading SRI database bestows a broad range of ESG data services and ESG solutions to meet your diversified and ever-growing needs in the field. yourSRI offers a broad range of first-class products and services:

ESG Investment Screenings

yourSRI's “ESG Fund & Portfolio Screening” tool offers a standardized framework for measuring and benchmarking ESG characteristics on a dynamic level. They enable in-depth analyses on the sustainability risks of the investment holdings as well as detailed peer group comparisons.

Carbon Investment Screenings

yourSRI's “Carbon Fund & Portfolio Screening” tools allow investors and investment specialists to identify the carbon footprint by tracking and measuring the greenhouse gas emissions of all underlying holding companies.

ESG Company Ratings

Covering more than 5,500 Large, Mid and Small Cap companies, yourSRI enables access to all ESG Company Ratings by MSCI ESG Research, providing research, ratings, and analysis of companies' ESG factors that may not be captured by conventional analyses.

ESG News & Developments

yourSRI cooperates with Responsible-Investor.com to supply business critical ESG news flow, data and industry sector developments. The data can help investment professionals to gather background information and cover sustainable finance news globally.

The screenshot shows the 'Intangible Value Assessments (IVA) - Overview' section of the ESG Investment Screening report. It includes a pie chart showing the distribution of IVA across three categories: Intangible Value Assumptions (62.5%), Higher Risk/Roll (37.5%), and Moderate Risk/Roll (0%). Below the chart is a table titled 'Portfolio Distribution' showing the percentage of assets allocated to different ESG risk categories: Lower ESG-Risk (58.7%), Moderate ESG-Risk (32.5%), and Higher ESG-Risk (8.8%).

The screenshot shows the 'Top 5 Absolute Contributors' section of the Carbon Investment Screening report. It includes a bar chart showing the top 5 individual companies contributing most to the greenhouse gas emissions in the portfolio. The companies and their weights are: SGS PLC ORD (27.4%), Compagnie de Saint Gobain SA ORD (17.4%), Nestle SA ORD (12.7%), Unilever PLC ORD (10.2%), and L'Oréal AG DEO (5.5%). Below the chart is a pie chart titled 'Top 5 Carbon Intensive Firms per 100 CFI invested' showing the distribution of carbon intensity across five firms.

The ESG Investment Screening report offers in-depth analyses on the sustainability risks of the investment holdings as well as detailed peer group comparisons on a dynamic level.

The Carbon Investment Screening enables investors to identify the carbon footprint of a fund or a portfolio by tracking and measuring the greenhouse gas emissions of all underlying holding companies.

About yourSRI

yourSRI is the leading database and research engine for responsible investment products and services and forms part of CSSP, Center for Social and Sustainable Products AG. The database is a “one stop-solution” for financial and extra-financial information and provides a wide range of search, comparison, assessment and screening functions.

yourSRI offers an integrated approach for sustainable and socially responsible investments (SRI), ESG (environmental, social and governance) factors and carbon data services and solutions. The database provides financial data in combination with specific ESG information. This allows an in-depth comparison of funds both from a financial and sustainability perspective.

Search & Compare

yourSRI's "Search & Compare" tools enable you to search, find and compare investment products and access a broad range of SRI data and information as well as company data across regions, categories and themes.

yourSRI provides global coverage for several thousand companies, investment products and research documents as well as a broad variety of reports and surveys. For example, the database contains all Large, Mid and Small Caps across the major investment markets worldwide. yourSRI's fact sheets and screening reports bestow detailed financial and extra-financial product information and deliver instant access to relevant product information.

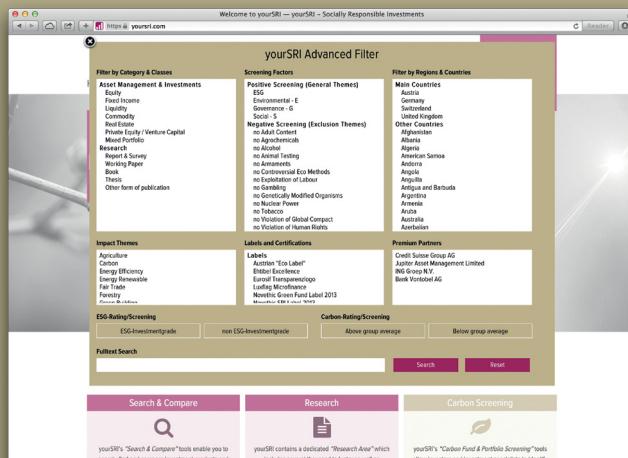

yourSRI services the entire investment value chain including asset and wealth managers, investors, rating agencies, advisors, academics, corporates and NGOs. yourSRI partners with a network of global alliances to promote and raise awareness concerning the latest trends and issues in SRI, ESG and sustainable investing.

Research

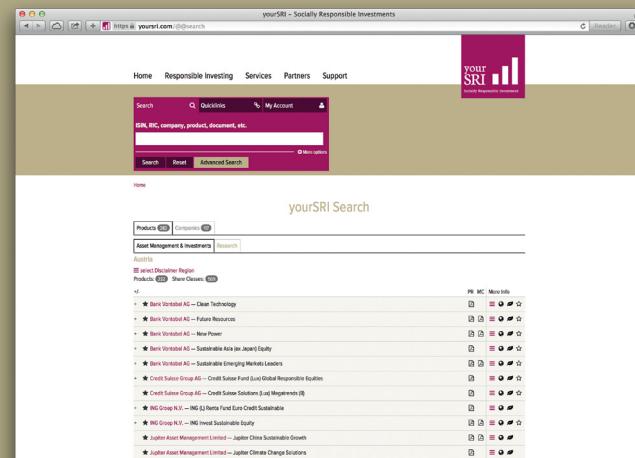

yourSRI contains a dedicated "Research Area" which includes several thousand industry as well as academic research reports and surveys and covers a broad range of SRI and ESG themes

„Take your ESG Risk Assessments to the next level with yourSRI“

yourSRI's "Search & Compare" tools enable you to search, find and compare investment products and access a broad range of SRI data and information as well as company data across regions, categories and themes.

yourSRI's database contains a range of advanced filter functions to help consider key ESG risks and identify relevant opportunities for investment portfolios across regions, categories and themes.

The database offers in-depth information about SRI products and allows clients to search, find and compare funds and access a broad range of SRI data and information as well as company data.

Background on SRI and ESG

Sustainable and responsible investing has become a global phenomenon driven by investors, investment managers and rating agencies.

Investors are finding it increasingly hard to keep up with the complexity of global businesses and the array of company, financing and supply chain risks they might encounter, many of which fall under the umbrella of ESG factors. Hence, there has been growing interest and demand for incorporating these extra-financial aspects into investment management decisions.

The concept of sustainable investing has become an integral part of the financial world. However, the initial interest in extra-financial information has shifted towards measuring and benchmarking ESG factors, establishing a holistic risk management approach and evaluating the effectiveness of ESG integration.

As a consequence, there is now a strong demand for rigorous SRI and ESG products as well as services which can help investors identify, assess and manage ESG risks and opportunities within their portfolios.

yourSRI is a “one-stop solution” which is designed to meet your diversified SRI and ESG needs. The database provides in-depth information and access to first-class ESG products and services.

yourSRI's Global Network Partners

yourSRI is a “one stop-solution” for responsible investment products and services providing a wide range of search, comparison, assessment and screening functions. The database offers global coverage for several thousand companies, investment products and research documents as well as a broad variety of reports and surveys.

yourSRI works with a global network of service and data providers to establish the next generation of ESG data services. This combined expertise forms the basis for our integrated approach towards SRI, ESG and carbon data solutions and allows clients to perform an in-depth comparison of funds both from a financial and sustainability perspective.

Together with our partners, we endeavour to promote and raise awareness concerning trends and issues in the field of socially responsible and sustainable investing, aiming for greater transparency, comparability and measurability.

Over the years, we have developed and implemented a series of co-branded products and services, campaigns, events and thought leadership initiatives. Our initiatives have a long-term focus and contribute significantly to a sustainable social, ecological and economic development.

If you are interested in partnering with yourSRI, please contact us for more information: www.yourSRI.com.

A screen shot of the Aberdeen Asset Management PLC – yourSRI – Socially Responsible Investments website. The page shows a search bar and navigation links for Home, Responsible Investing, Services, Partners, and Support. A sidebar on the right features the yourSRI logo. The main content area displays the company's ESG Company Rating, which has been downgraded from 'AA' to 'AA'. It also includes sections for Ratings Comment, ESG Prior Performance, and Key Issues.

A screen shot of the Mrs Anna Werle – yourSRI – Socially Responsible Investments website. The page shows a search bar and navigation links for Home, Responsible Investing, Services, Partners, and Support. A sidebar on the right features the yourSRI logo. The main content area displays a comparison between two funds: ING Invest Sustainable Equity - ICap and Future Reserves - A. It includes sections for Identifiers, Investment Data, Classification, Regional Focus, Customer Bank, and Investment Company.

Through a partnership with MSCI ESG Research clients can now access MSCI's "ESG Company Ratings" covering more than 5,500 Large, Mid and Small Cap companies of the major investment markets.

The Fund Comparison Tool allows to make a side-by-side comparison of multiple funds. This allows an even better overview for analyzing investment products on yourSRI.
